Time geography or time-space geography is an evolving transdisciplinary perspective on spatial and temporal
processes and events such as social interaction, ecological interaction, social and environmental change,
and biographies of individuals. Time geography "is not a subject area per se", but rather an integrative
ontological framework and ...

Time geography - Wikipedia

For the first time, scientists have entangled four photons in their orbital angular momentum. Leiden physicists
sent a laser through a crystal, thereby creating four photons with coupled 'rotation'.

Leiden physicists entangle four rotating photons

As the organoid develops, the tissue in the outer part folds in a manner similar to those in the developing
brain. To learn more about the development of folds, the researchers ran the same ...

Using organoids to understand how the brain wrinkles
