

attention frontiers of cognitive pdf

Attention is the behavioral and cognitive process of selectively concentrating on a discrete aspect of information, whether deemed subjective or objective, while ignoring other perceivable information.

Attention - Wikipedia

Procedural memory is a type of implicit memory (unconscious memory) and long-term memory which aids the performance of particular types of tasks without conscious awareness of these previous experiences.

Procedural memory - Wikipedia

Brief Biosketch. Adele Diamond, PhD, FRSC is the Canada Research Chair Tier I Professor of Developmental Cognitive Neuroscience at the University of British Columbia (UBC), Vancouver, BC, Canada.

To celebrate this new power pose by Frontiers, I bring below some of their most amazing articles which I stumbled upon during last months. The common feature of those articles, some of which seem more like crackpot lunacies than actual science: they all come from wealthy universities, in US, Western Europe, Japan.

Quality preschool programs that develop the whole child through age-appropriate socioemotional and cognitive skill-building hold promise for significantly improving child outcomes. However, preschool programs tend to either be teacher-led and didactic, or else to lack academic content. One preschool model that involves both child-directed ...

Le neuromarketing est l'application des neurosciences cognitives au marketing et à la communication.

Le but de cette discipline émergente est de mieux comprendre les comportements des consommateurs grâce à l'identification des mécanismes cognitifs qui interviennent lors d'un achat ou face à une publicité.
