CIVL 4135 Chapter 1. Introduction 2 A problem unique to the design of reinforced concrete structures is the need to detail each member throughout.

Reinforced Concrete Design - Civil Engineering - Memphis

Concrete blocks are five or six times larger than bricks, so you might think that setting blocks would be about that much easier. But the blocks are heavier than bricks “about 40 pounds” and require more mortar, so there’s little time or effort saved.

As a basic course for undergraduates majoring in civil engineering, this course is different from either the previously learnt mechanics courses or the design courses to be learnt. Compared with mechanics courses, the basic theories of reinforced concrete structures cannot be solely derived by theoretical analysis. And compared with design courses, this course emphasizes the introduction of ...
