Disease: Identification, Prevention, and Control - Barbara

This text presents current information about infectious and non-infectious diseases and their histories, from a nonclinical point of view; it is written to support the needs of health education students and professionals, rather than clinicians. Including an overview of the principles of disease occurrence and of the body's defenses, it provides key details and stimulating information regarding the body's vulnerability to disease.

Recommendations for Identification and Public Health

Infections and infectious diseases are a great burden on many societies, including the countries in the WHO European region. To reduce that burden an integrated approach is required, combining health promotion, disease prevention and patient treatment. The prerequisite for success in this fight is the participation of all health care professionals. Nurses and midwives, as major frontline ...
