A dishwasher is a mechanical device for cleaning dishware and cutlery automatically. Unlike manual dishwashing, which relies largely on physical scrubbing to remove soiling, the mechanical dishwasher cleans by spraying hot water, typically between 45 and 75 °C (110 and 170 °F), at the dishes, with lower temperatures used for delicate items.

Dishwasher - Wikipedia

Sometimes all you need to get your major home appliance working is the use and care, owner's manual or user's guide that has long since disappeared.
