Problem Description. The problem we are going to look at in this post is the International Airline Passengers prediction problem. This is a problem where, given a year and a month, the task is to predict the number of international airline passengers in units of 1,000.

Time Series Prediction with LSTM Recurrent Neural Networks

Philosophy of language is the reasoned inquiry into the nature, origins, and usage of language. As a topic, the philosophy of language for Analytic Philosophers has been concerned with four central problems: the nature of meaning, language use, language cognition, and the relationship between language and reality.
