Rebar (short for reinforcing bar), known when massed as reinforcing steel or reinforcement steel, is a steel bar or mesh of steel wires used as a tension device in reinforced concrete and reinforced masonry structures to strengthen and aid the concrete under tension.

Rebar - Wikipedia

3 Cut faces are often positioned on the boundary of properties, which places a limit on the footprint of the wall system. Any of the wall types requiring reinforcement will not be suitable in such cases, as the reinforcing elements (grids or
