

### **principles of transactional memory pdf**

In computer science, software transactional memory (STM) is a concurrency control mechanism analogous to database transactions for controlling access to shared memory in concurrent computing.

### **Software transactional memory - Wikipedia**

Learn about transaction processing systems, processing systems components, and different service-oriented architecture approaches including representational state transfer.

### **Transaction processing system examples and SOA approaches**

### **Technical Reports | Department of Computer Science**

My research focus on design and implementation of programming abstractions in areas that have included real-time embedded systems, concurrent and distributed systems and more recently scalable data analytics.

### **Jan Vitek @ NEU**

In computer science, compare-and-swap (CAS) is an atomic instruction used in multithreading to achieve synchronization. It compares the contents of a memory location with a given value and, only if they are the same, modifies the contents of that memory location to a new given value.

### **Compare-and-swap - Wikipedia**
