This book contains lectures on the Economic Development of Japan which was delivered in English by the author at the National Graduate Institute for Policy Studies (GRIPS) in Tokyo from 1998 to 2004.

The Economic Development - GRIPS

ways in which water is the same as, or different than, other commodities from an economic point of view. While there are some distinctive emotive and symbolic features of water, there are also some distinctive economic features that make the demand and supply of water different and more complex than that of most other goods.

The economic conception of water - Goldman School of

represents the point at which an economy is most efficiently producing its goods and services and, therefore, allocating its resources in the best way possible. If the economy is not producing the quantities indicated by the PPF, resources are being managed inefficiently and the production of society will dwindle. The production possibility frontier shows there are limits to production, so an ...
